SUPERIOR COURT

Judgment No. 65. Walter Clark Dr. vs Maude Clark Cr., judgment. Divorce. Custody of child and \$15 per month for its support.

BE'S LAXATIVE COUGH SYRUP

RELIEVES COUGHS AND COLDS

The Mystic "23" As Exemplified

The mysterious "23" conjures no longer visions of flight for our reporter. Instead, he has a bathing for the one who invented the generally accepted definition of the number "23," for his optics have not deceived and henceforward he will incline to the belief that "23" does signify time to fly, but upon the contrary should cause one to ponder, reflect and bring into action all of his latent "staying" qualities. Explanation:

Assistant School Superintendent Hutchins is today in the midst of a joyous task that of holding an examination for teachers who would assume to teach Young America how to shoot. There are 23 of the aspirants, all of whom are young, wise and vivacious, taking the examination merely as a formality. They are going to teach your brothers and your sons how to become great men, to instruct your sisters along the lines that perfect them in womanhood. They are of the bulwark of our nation, and even if they are denied suffrage they will instruct the rising generation as to the prerogative of a freholder. Their names are:

Ruth Henegan, St David; Julia Miner, Courtland; Harriet Witt, San Simon; Alberta Fulghum, Dragon; Ruby Fulghum, Wilcox; Ora Naylor, Whitewater; Nettie Gallagher, Stronghold; Marie Albrecht, Douglas; V Baker, Railings, Texas; Bertha Baker, Wilcox; Laura Wimberly, Gieson; Ola Dial, Rodes; Blanche Hutchison, Douglas; Irene McAllister, Anna Garel, Bisbee; Laurie Baker, Douglas; Grace Carrigan, Apodaca; Rebecca West, Wilcox; C L Stafford, Rucker; Mary Purser, Bisbee; K L Carlisle, Tulsa; Osa Carlisle, Lee; Ora Nive, Artesia.

Special Subjects—Ava Welmer, drawing, Bisbee; H B Rose, manual training, Douglas; F S Hamilton, manual training, Bisbee; M A Newkirk, special diploma, Bisbee; W C Dalzel, special diploma, Bisbee.

Copper Queen Purchases Bradford Group

An important mining deal has just been closed, by the terms of which the Copper Queen Consolidated Mining company have purchased from Edward McFarland the Bradford group of claims situated a mile from Bixton station on the Tucson-Nogales railroad.

The mines are producers, and McFarland has been shipping ore for some months. The property was recently personally inspected by Dr. James Douglas and his chief mining expert.

The consideration involved in the sale has not been made public, but is said to be about \$75,000.

Woman Suffrage Has Good Outlook

Ten weeks hence, when the voters decide the fate of the proposed equal suffrage amendment, every county in Arizona where a vigorous campaign is being waged, is expected to roll up a big majority for the "Votes for Women" movement.

Throughout the summer months suffrage leaders have been quietly at work, and as a result the state is thoroughly organized. Interest of men and women has been aroused and volunteer helpers by the score are announcing themselves ready to take up any branch of detail work in behalf of this civic advancement.

The campaign gives promise of being exceptionally well conducted and will be under the direction of Mrs. Frances W Munds of Prescott, chairman of the Arizona equal suffrage central committee, and for many years the head of the movement in Arizona. Mrs. Munds has not made public her plans, but a few of her ideas have leaked out, and for skill and ingenuity credit to the most seasoned political campaigner.

The jurors now serving on the superior court spent Labor Day at their homes, returning last evening and this morning to resume their duties in dealing out justice when required today.

From Wednesday's Daily

Mrs. J. H. Marden and daughter, Miss Bee, returned last evening from a two months' visit to San Francisco and other coast points.

Walter Melgreen returned last evening from Bisbee. He has entirely recovered from his recent illness and is again circulating among Tombstone friends.

W. H. Seever, one of the Sulphur Spring Valley residents, is in attendance on court.

James Flynn, assistant manager of the Reed Fuel and Feed stores, returned today from a business trip to Bisbee.

Nearly all of the visiting teachers who were taking examinations here today for teachers' certificates, completed their work at noon and departed for Douglas to attend the county teachers' institute now in session at that city. The departure of the 23 fair visitors did not fail to leave its attendant heartaches with a large number of Tombstone bachelor admirers.

George Whalen, a prominent Bisbeeite, and an uncle of Mrs. John Rock of this city, is a Tombstone visitor today, having driven across the mountain from the big copper camp this morning.

The Barnum & Bailey Greatest Show on Earth is announced for two performances in Phoenix on September 23. Do you think you will attend?

Dave Adams, one of the substantial citizens of the north end of the county, is a Tombstone visitor today, having business before the court.

The county supervisors are to meet Friday, September 13th, to canvass the primary election returns, this being in accordance with the law which says the canvass of votes shall be made the Friday following the election. Those aspirants who find themselves outdistanced by more favored sons may find consolation for defeat by pointing to the hoodoo 13 and the so-called "hangman's day," upon which the result will be declared.

New Shops Will Be Larger Than Ever

Southern Pacific shops to cost one-third more than former plans called for have been authorized and work begun Monday morning on the new site for the big plant.

The capital outlay will be between \$75,000 and \$100,000. This is an addition to the already extensive shops in operation Tucson.

The citizen says the plant will have facilities for rebuilding locomotives of the largest type.

Also authorized is a 350,000 gallon tank for storage of chemically treated water for locomotive boilers.

A third improvement authorized is a 65,000 gallon steel oil tank on a high tower, which means continuous service, sufficient for 20 locomotives.

Three quarters of a mile or more siding is to be built.

Boosting for The Wilcox Fair

J. W. Atgle, vice-president of the Wilcox Fair Association, is in Tombstone today on court business and, incidentally, to talk about the big fair to be held at Wilcox September 11 to 14 inclusive. Although an interesting program has been prepared for the occasion, Mr. Atgle states that other events are attached as they are suggested, the more recent being a drilling contest, the prize for which is to be \$50. Those in charge of the Wilcox Fair are putting forth every energy to make the coming show an event to be appreciated, and the metropolis of the Sulphur Spring Valley will assuredly maintain its well-earned reputation for courteous entertainment. The Wilcox Fair should meet with merited success.

Arizona's First Federal Aid

The first appropriation law made by the government of the United States for an irrigation project was made for a canal in Mohave county says Our Mineral Wealth. In 1865 Charles D. Poston, Arizona's first delegate to congress, obtained an appropriation of \$150,000 with which to construct a canal for the Mohave Indians. This was the first time government aid was advocated and the first money appropriated for such work.

New Game Law Makes Change In Rules

Now that the open season for ducks and geese is approaching, opening on September 1, and since other game will be available at later dates, the following list of seasons for game under the new laws of Arizona is published in order that no nimrod may unwittingly go astray and violate the game laws:

Male deer and turkey, October 1 to December 15.

Quail, snipe and rail, October 15 to February 1.

Ducks, geese and brandt may only be killed between September 1 and April 1, and no more than 25 in one day.

The open season for doves and white wings is from June 1 to January 1, and 35 may be killed in one day.

Trout June 1 to September 1.

Black bass, strawberry bass and crappie, September 1 to December 1.

When hunting or fishing remember the following:

Don't kill more than two male deer or wild turkeys in one season, and but 20 fish in one day, and no fish less than seven inches in length.

Fish only with hook and line.

Sell no protected game or fish, even in open season.

Closed season—Antelope, mountain sheep, elk, female deer, fawns, roadrunners, bob white, grouse or pheasant.

If a resident citizen of the state, pay a license of 50 cents per year. For big game non-residents pay \$25 for a license or \$10 for a bird license.

Aliens pay \$100 for big game, and \$25 for bird license per year.

Ship no game out of state except when holding permit, which costs \$2.50.

Wild turkeys are considered big game.

Shoot no song birds.

Take no eggs from birds or young from game.

Hunters may not hunt game unless more than 12 years of age.

Hunters must not shoot from or across a public highway.

No Fighting at Cananea

Reports of fighting at Cananea could not be confirmed at Naco last night. One report to the effect that federalists had engaged a band of rebels south of Cananea reached Bisbee last night, but according to information obtained from Naco, nothing so interesting happened at the copper camp, or if it did happen, no talking had reached Naco, which is in constant wire communication with Cananea.

According to General Manager Walter Douglas of the Phelps-Dodge interests, a telegram received by him from the south stated that the rebels left Naco on Monday afternoon, moving toward the west. There was an engagement between 100 federalists, who were given as three wounded.

Eleven bridges have been burned by the rebels, which will be repaired as soon as possible, stated Mr. Douglas. He also said that no cars had been destroyed or engines injured, but that two carloads of concentrates had been wrecked.

Generous Bequests By Former Tombstoner

The value of the estate of Hugo Richards, who died in Prescott July 19, 1911, is approximately \$367,000, according to the inventory filed and appraisement made under order of the probate court, and as filed with the superior court of Yavapai county.

Richards, who was a Tombstone resident in early days, left a bequest which specified the following were to receive the sums of \$14,000 each, or in the aggregate of \$98,000: Mary M. Love, Elizabeth Love, Mary M. Johnson, Sidney C. Love, Alex E. Johnson, Edward R. Johnson and Hugo R. Johnson. The remainder of the estate is willed to the widow.

The Labor Day dances at Gage Hall last night, under the auspices of the Tombstone City Band was a pronounced success from every standpoint. The attendance was large, the music was excellent and the torchlight parade a pleasant evening.

Delegates to the Irrigation Congress

The board of supervisors today, besides auditing the regular county demands, appointed five Cochise county delegates to the National Irrigation Congress to convene at Salt Lake City on September 30th. The delegates named are G. J. McCabe, Garove; J. H. Grey, Bisbee; H. A. Morgan, Wilcox; E. P. Grindell, Douglas, and J. A. Merrill, St. David.

An appropriation of \$200 was made for the Southern Arizona Fair Association at Wilcox to assist the annual Cochise County Fair, which will open on the 11th inst.

J. W. Angle of Wilcox was appointed a delegate from Cochise county to the National Dry Farming Congress at Lethbridge, Canada, and an appropriation of \$300 was made to provide for a dry farming exhibit from Cochise county at the congress. Mr. Angle will make an effort to bring the National Congress to Cochise county next year.

Vast Deposit of Potash Discovered

John Knaster, a fireman on the Santa Fe, Phoenix & Prescott railway, after making an investigation of the potash fields situated near Parker on the California side of the river, gives an interesting account of the discovery made some time ago, announced in a public letter to the National Congress to Cochise county next year.

He is one of the original locators of the fifteen, and states that the quality of the commodity has been determined by analysis to be of a high grade. He was in the field with his associates for thirty days, and says the deposit lies in a blanket formation, ranging to as thick as three feet.

Los Angeles capitalists have been on the ground with their experts, and made an offer of \$250,000 in cash, which was refused after a consultation of the owners took place. The range of the potash formation extends for over fifteen miles, of varying width, while the quality is uniform on all locations. This is the only known bed in the United States, most of it coming from Germany.

Timely Action of Board of Supervisors

The board of supervisors last evening redistricted the county by cutting down and expanding at the same time. Instead of twenty-one judicial precincts, as heretofore, there are 7 now, to maintain which will be a saving to the county of from \$1,000 to \$1,200 per month, an item that the taxpayer will appreciate. As Arizona assumed the dignity of statehood with a progressive spirit, so too has the board of supervisors hewed along lines that uphold that spirit. The general public expect economy of affairs general, and as the board is composed of thorough business men their actions will be seen to have been taken in the interest of the public weal. As an illustration of the old regime, Paradise was a judicial precinct last year, from which one case was reported to the county seat at a cost of \$4, while justice court officers for that precinct was paid \$650 for occupying the positions during the year. Paradise is now annexed to the Douglas judicial precinct, and instead of a considerable and justice of the peace at that point a deputy sheriff will look after the peace and comfort of that quiet section and any infringement of the law as made and provided will be regulated by the justice of the peace at the Smelter City. Other instances might be cited, but the prime reason for having eliminated districts and enlarged others is to have seven courts do the work that twenty-one were hitherto paid for, saving, as above stated, \$1,000 to \$1,200 per month, and that, too, without impairing the grid of justice.

The PROSECUTOR is of opinion that the action of the board will meet with hearty favor, as the action had been talked of much of late and meets the approval of the Taxpayers' Association, J. N. Gainer, the secretary of the association, having championed the action taken by the board last evening.

From Tuesday's Daily

Mrs. Ivey, mother of Arthur Ivey of the county recorder's office, returned yesterday from Los Angeles, where she has been visiting during the heated term.

County Assessor E. A. Hughes and family returned to Tombstone yesterday after an absence of several weeks at southern California coast resorts. Mr. Hughes has but little to say in commendation of the seaside resorts as those places appeared to him. Unfortunately, his family became afflicted, and it was not without considerable vexation that he succeeded in procuring competent help for the sick room. Besides, he says, grafting is practiced there along scientific lines with a view only that the grafter get rich in one season. Mr. and Mrs. Hughes are pleased to be back in Tombstone.

F. M. Hartman, a prominent attorney of Tucson, is in Tombstone today, having legal business before the superior court.

The copper stakes of the state fair yesterday received an accession in a letter from S. W. French, general manager of the Copper Queen, announcing that the company would contribute \$500 to the fund.—Phoenix Republican.

A. H. Gardner and wife have returned from Los Angeles, where Mr. Gardner has been under treatment for a severe attack of blood poisoning in the hand. It was Mr. Gardner's intention to go to Magdalena Bay and rid those secluded waters of the many fish that the Japanese government is yearning for, but owing to the fact that his piscatorial digit is out of commission he had to forego that laudable purpose and leave those debatable grounds overflowing with the flaky tribe and international complications may follow as a result. Mr. Gardner is now beyond danger, though he continues to suffer from his misfortune.

The Misses Josephine McPherson, Lorne McPherson, Leona Tracy, Helen Axtell and Helen Benedict, all Tombstone teachers, left yesterday for Douglas where they will attend the county teachers institute.

At Globe more than 500 men are now employed at the Inspiration Consolidated mines in addition to a force of about 60 engaged in railroad construction under McArthur Brothers.

The Boquila Land and Cattle Co. will commence the roundup on the 10th inst., starting at Huachuca Siding and working two separate outfits in opposite directions.

Billy Graham, the distinguished legislator of Cochise county, is in attendance upon the superior court, having come over from his home at Lowell last evening.

The concert by the Tombstone City Band at the City Park Saturday evening was a marked success. A large and appreciative thr
